FireID Authentication Server

VERSION 2.3.0 RELEASE NOTES

1. Introduction

This document describes the changes and enhancements to the FireID Authentication Server version 2.3.0.

2. New Features

2.1 Improved Audit Trail Features

Issue	Area	Subject
US833	Audit Trail	Integration of Audit Trail with Security Event Managers using Syslog
<p>This feature has been added to the Authentication Server to allow enterprises that maintain centralised log servers to integrate FireID Authentication Server logs in their logging system. FireID now supports the Syslog protocol for such integration.</p>		

Issue	Area	Subject
US834	Audit Trail	Improved Audit Trail coverage
<p>The FireID Authentication Server now features improved Audit Trail coverage.</p>		

Issue	Area	Subject
US835	Audit Trail	Improved Diagnostic Logging
<p>The FireID Authentication Server now features improved Diagnostic Logging. All events on the server are now logged in detail, with configurable level.</p>		

Issue	Area	Subject
US840	Audit Trail	Improved Audit Trail Search
<p>The FireID Authentication Server now features an improved Search interface under the Audit Trail tab. Searching for events based on username and/or cellphone numbers has been refined and the user interface is easier to navigate.</p>		

3. Resolved Issues

Issue ID	Area	Subject
DE341	User Interface	When using Internet Explorer 8, a 'Session Expired' error message is displayed when clicking on System Configuration -> About. This issue has been resolved.
DE388	User Interface	The Diagnostics page can be copied and pasted in another browser without requiring a login. This issue has been resolved.
DE423	Server Update	The FireID Server update script did not work when multiple IP addresses were specified on the Authentication Server. The script has been modified to work with multiple IP addresses.
DE439	Backup & Restore	An error message is displayed when restoring without selecting a backup file. This issue has been resolved.

Table 1 – Resolved Issues

4. Known Issues

Issue ID	Area	Subject
DE436	Diagnostics	The 'wget' diagnostics test fails.
